4. Use this array to help you complete the bar model below.

20				
4	4	4	4	4

4 × **4** = **16**

5 × **4** = **20**

5. The number shapes represent 5 × **5** = **25**

If each hole was worth 10, what would the shapes represent? **50 (5 × 10 = 50)**

6. Solve this calculation.

3 × **4** = **12**

Use it to work out this:

30 × **4** = **120**

7. 4 × 40 = **160**

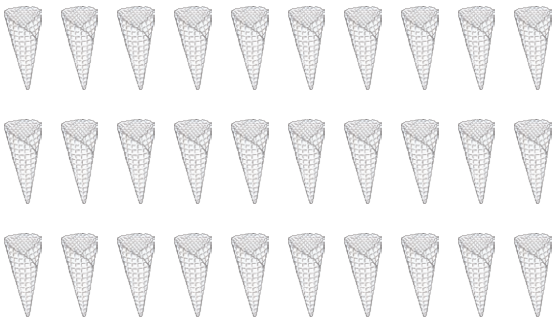

13 × 10 = **130**

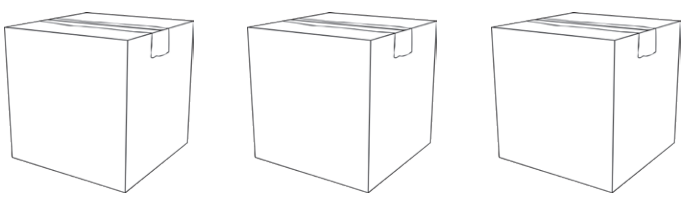

180 = 3 × 60

180 ÷ 2 = **90**

8. There are 30 ice cream cones in a box. How many will there be in 3 boxes?

90 ice cream cones (30 × 3 = 90)

9. Mrs Bourne has 5 boxes of pencils. Each box has 40 pencils in it. How many pencils does she have altogether? **200 pencils (5 × 40 = 200)**

10. Anwar says "4 × 70 = 280"
    Is he correct? Show your working out and explain how you know.
    Anwar is correct: 4 × 70 = 280. I know this because 4 × 7 = 28 and 28 × 10 = 280.
