Deepen Activities

1 Three fractions have been written on the whiteboard.

- In the first fraction, the numerator is an odd number.
- In the second fraction, the denominator is 4.
- In the third fraction, the numerator is smaller than the denominator.

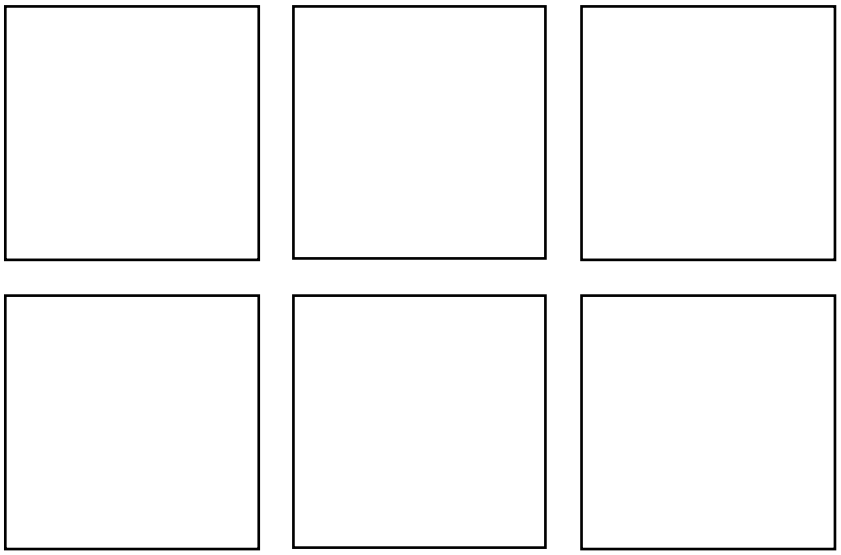

a) What could the fractions be?

b) How many different answers can you find?

2 The country of Fractonia has a square flag. A quarter of it is one colour and three quarters another. What could the flag look like?

Can I show a half by splitting the flag into more than two equal parts?

3 Class 2 has fewer than 30 children.
Half of them travel to school by car.
A quarter of the children walk.

a) What could the numbers be?

b) How many children could be in the class?

I tried using Base 10 blocks to help me find different answers.
