

Big Cat, Little Cat by Lisa Regan

Big cats like to take naps

In the wild, big cats can sleep for up to 20 hours a day. They nap in the day because they hunt at night.

Little cats nap too

They can sleep up to 18 hours a day. Little cats also like to hunt for food at night.

Big cats have sharp teeth

Big cats eat meat so their teeth need to be extra sharp. They have long, pointed front teeth. These are for biting and killing. Their back teeth are like knives. They are used for tearing meat from bones.

Little cats have sharp teeth too

Little cats' teeth are not as big, but they are still very sharp! Little cats love meat too. They catch rabbits and birds.
