

Crime and Punishment

Year 5/6

Summer 1

Crime has existed since the dawn of time, but the ways in which humanity has dealt with it has evolved. The evolution of crime and punishment says a lot about how humanity has grown and evolved as well. So, when did crime and punishment start? How has it changed over the centuries? What factors lead people to

commit crimes?

Reading

During Reading lessons, children will be reading and completing writing tasks based upon *Murder by Narwhal* by Alex T Smith. Children will continue to develop their inference and retrieval skills through comprehension tasks and whole class discussions. Vocabulary knowledge will be built upon throughout the text.

English

Throughout English lessons, children will be discovering a story of enchantment - *Paradise Sands* by Levi Pinfold. Children will also continue to expand upon their grammar skills from the Year 5 and 6 curriculum, before writing their own ghost story.

Maths

During our Maths sessions this half term, children will learn about the following: shape, geometry and measurements of angles. We will also continue to work on problem solving and reasoning skills.

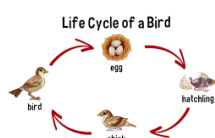

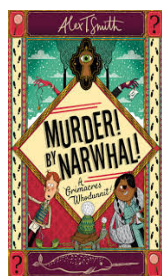

History

Children will be learning about crime and punishment and will be taken on a journey through British history as they discover how crime and punishment has changed through the ages. Beginning with the Romans and travelling right through to present day. Children will discover how changes in society create changes in the kinds of crime that are committed, as well as the ways in which they are punished.

PE

Children will participate in track and field events in preparation for KS2 Athletic events including Sports Day.

Children will also take part in Cricket, Ultimate Frisbee and other Traditional sports.

French

Children will develop their oral and written skills when describing where they live and which rooms they do and do not have in their house.

PSHE

Relationships

Children will identify ways to solve friendship issues, help others to feel part of a group and show respect in how they treat others. Children will develop their understanding of what makes a good relationship.

Art

Children will learn about the history of Pop Art, great artists Roy Lichtenstein and Andy Warhol and Ben Day dots before mimicking the Pop Art style.

Science

As a part of our Science topic 'Living things and their habitats' children will be able to describe how living things are classified into broad groups according to common observable characteristics based on similarities and differences. The children will learn about the different life cycles of living things and how they produce offspring of the same kind.

RE

What do organised worldviews have to tell us about what truth is and where it might be found?

We will identify the importance truth plays in different worldviews by finding examples throughout different practices.

Computing

Children will learn how to programme variables in games. They will write algorithms, test and debug their code before sharing their games with others. Children will also learn and apply knowledge of: Copyright and ownership, Privacy and security and Managing online information.
