Year 2 Autumn 1 My Family

Maths

In Maths, we will be learning how read, write and order numbers up to 100 and add them to a number square. We should be able to count forwards and backwards in 1's up to 20 and in 10's to 100. We will also know what both digits represent in a 2-digit number. We will also compare lengths and measure in non-standard units. Maths skills, such as presenting solutions to problems in an organised way, explaining decisions, methods and results and using mathematical language will also be encouraged.

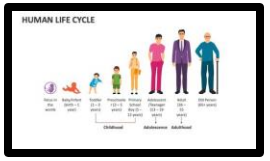

English

In English, our phonics skills will be practised continuously to support with reading and spelling. Handwriting, focusing on joining, will be taught throughout the half term. We will focus on stories set in familiar places, such as "The Little Red Hen". We will then write our own stories, character profiles and diary entries based on these stories.

Science

In Science, we will think about what animals and humans need to survive and how we can stay healthy. We will sequence the human life cycle and name parts of the body looking at similarities and differences to others.

Music

Music, this half term, will focus on a variety of percussion instruments. We will use our bodies and voice to create interesting sounds on our own and with others.

Geography

Geography will focus on maps of the world. We will learn our home addresses and how this fits into the world. Compass points will also be taught and used to plan a route to school using aerial photos.

History

History will cover changes within our living memory; these will be placed on a timeline. The children will also explore their own family trees and discover how different families are made up.

Art

In Art, we will discover artists such as Picasso and Brianna McCarthy, working towards making our own self portraits.

PE

PE will focus on coordination and control in order to be confident and safe in the spaces we play in. We will practice this using a range of equipment and work together to make up our own games

RE

RE will focus on some world religions, specifically thinking about how stories might change how we see the world. We will think about how sharing ideas is important and link this to harvest.

Computing

In computing, we will practice logging onto a computer and learn about different types of IT. Online Safety will cover technology around us and how we can be safe using this.

PSHE

PSHE will look at Being Me in My World. This talks about hopes and fears, who to ask for help, rights and responsibilities and being a member of a class.
